

Davos Climate and Energy Consortium

Organizations with a shared interest in advancing progress on the global climate and energy will come together during the week of **January 20th in Davos Platz, Switzerland.**

The **Davos Climate Consortium** objective is to serve as the **pivotal link connecting innovations with the people and resources** needed to accelerate the global development of proven solutions to address energy needs and climate change.

We will be hosting Roundtable discussions to review the most promising **technologies to address the climate and energy crisis.** These meetings will result in Research Reports and White Papers targeted to Ministers of Energy, Economy, and Sustainability at countries worldwide. Our core objective is to accelerate the scaling of proven solutions.

POWER OF NETWORKS

By connecting innovators and entrepreneurs into a collaborative network to create solutions. By engaging industry and governments to implement these ideas rapidly, **we accelerate projects that should be scaled.**

TECHNOLOGIES & SOLUTIONS

Solutions exist. We **scan the globe for breakthroughs** to build a database of the technologies for impact. We track promising developments to **ensure that the best ideas and the smartest people have the stage.**

ACCELERATION

We help companies with great technologies become **much bigger, much faster by monetizing their intellectual property.** This happens through collaboration on a platform for the solutions to reach the marketplace globally.

ENERGY CONSORTIUMS

Anchoring our strategy is a database of every key player in a sector and ongoing coverage of **companies capable of global scale.** We are building the only database of its kind that follows little known private companies.

WHITE PAPERS & ECOSYSTEM REPORTS

Capturing intelligence from the very smart people gathered in Davos helps improve our research efforts. We will be **developing white papers and ecosystem reports** for each of our consortiums.

ALTRU INSTITUTE

Davos Roundtable Sessions

Davos is where leading players worldwide gather. Altru's goal is to assemble global expert's leaders and engage in insightful conversations to drive our strategy going forward.

The **Altru Roundtable** is located under the Clock Tower in Davos Platz in the oldest building in Davos, the St. Johann's church who's tower dates back to the 13th century.

This venue is where we gather the best and brightest that are in Davos that week for conversations about the best way forward on topics of critical and the technologies areas that should be scaled.

Roundtable Sessions. Davos Consortium Follow-ups

A series of roundtable discussions to anchor white papers and research conducted by the Institute over the year. These topics are those in which the Institute has foundational knowledge of technologies that can be scaled globally.

The format is a small group of topic experts offering their views on technologies we have selected as well as addressing core questions:

1. **Challenge & Opportunities.** What are the biggest challenges and opportunities?
2. **Strategies & Technologies.** What are the most promising ideas, approaches, and technologies to address these challenges?

Climate Energy & Sustainability. Topics to include:

- ❖ Hydrogen
- ❖ Waste to Energy and Landfills
- ❖ Plastics Circularity. Microplastics.
- ❖ Energy Storage Batteries
- ❖ Nuclear Energy

Health and Wellness.

- ❖ Mental Health
- ❖ Longevity

White Papers. A primary outcome is guidance for our research and editorial teams as they create white papers on each of these subjects and insight on the key players as they build out our consortiums database.

Venue. Our extraordinary venue consists of the roundtable meeting room with its vaulted ceilings intimate sessions. Across the hall is a stunning space with stained glass windows and wall for presentation/film projections which Ideal for screening, lectures or receptions and can accommodate 100+.

These 60-minute discussions will occur throughout the week. Attendance requires registration. Space is limited. We are organizing Special Interest Groups for each of our core topics.

The schedule for specific sessions will be available in early December.
